

Stage II Vapor Recovery Training

As the nation's leading provider of UST testing and compliance services, Tanknology has drawn upon its extensive Stage II Vapor Recovery expertise to develop a comprehensive, self-paced training program to help operators comply with federal and state regulations requiring formalized operator training.

According to the U.S. EPA's publication, Technical Guidance-Stage II Vapor Recovery Systems for Control of Vehicle Refueling Emissions at Gasoline Dispensing Facilities:

"...owners and operators of gasoline dispensing facilities which incorporate the use of Stage I and Stage II Vapor Recovery Controls must be trained in the proper operation and maintenance of the facilities' equipment. Owners and operators will be held accountable for any and all violations subjected to the facility by the implementing agency."

STAGE II TRAINING PACKAGE

- Includes a workbook to use in conjunction with the CD or VHS tape through the self-guided training, and as a future reference guide.
- Includes an exam for each employee to demonstrate their understanding of proper Stage II vapor recovery maintenance and inspection.
- One package is required for each employee being certified.

Self-Paced Course

To assist our customers with this important regulatory requirement, Tanknology has developed a self-paced Stage II Vapor Recovery Training Course on DVD or VHS. This course is designed to train facility personnel on the proper operation and maintenance of Stage II Vapor Recovery systems, types of systems, and proper record keeping.

The course is a comprehensive two part training that includes a 90 minute training video or DVD, followed by a workbook examination.

The workbook can be used as a future reference guide for your employees. This course meets EPA certification standards. However, your state's air quality division may have specific regulations that you may also need to be aware of.

To learn more about Stage II Vapor Recovery Training, or to discuss compliance services for your site, call us today at 1-800-964-1250.
