

# Generator Set Compliance

Simply put, a generator set or “genset” is a piece of portable equipment, consisting of an engine and an alternator/electric generator, used to provide energy. Gensets are often present in large buildings where a power outages can cause significant or dangerous problems.

Modern society can't run without electricity. From Wi-Fi and communications to lighting and climate control, businesses require a steady stream of power to function. The mere presence of backup power systems is no longer enough, as with each passing year, environmental regulations place more of a burden on the owners of backup generators and ancillary fueling systems.

Are you confident that your facility is up-to-date with the latest Federal, state and local regulations and that your compliance program is adequately protecting your facility from a power outage, or costly and dangerous leak of fuel?

Tanknology is the largest and most capable company in the United States devoted to the testing and related compliance services for backup generators and fueling systems. With extensive experience in the complexities of backup power generation, we have the knowledge and capability to help tank and generator owners efficiently and cost-efficiently manage the multifaceted regulatory and safety requirements.

Tanknology can help healthcare facilities manage complex environmental regulations and oftentimes confusing testing requirements by offering:

- Tank, Line and Leak Detection Testing
- Monitoring System Certifications, Repairs and Installations

- Fuel Sampling and analysis
- Fuel Polishing
- Tank Cleaning
- Alarm Monitoring
- Sump Repairs
- Stage II Vapor Recovery Testing and Training
- Fuel additives
- Tank treatment
- And much more...

In addition, Tanknology offers cloud-based record keeping through our proprietary TANCS system. TANCS allows clients to easily locate and access testing records and related fueling system documents 24 hours a day, seven days a week, from any laptop or web-capable mobile device.

**Whether your need a turn-key compliance solution for your facility or help with a single environmental regulatory issue, Tanknology is here to help. Call our experts at 1-800-964-1250.**
