

Become a Tanknology® Licensee in your Country

With more than two million precision tests completed and nearly 30 years of experience, Tanknology is the international leader in forecourt testing and inspection services for underground storage tank (UST) systems.

Our leadership and success continue to grow as new Licensee Partnerships are formed across the globe.

Currently the company has 23 Licensees bearing the Tanknology name and operating Tanknology's proprietary technologies in more than 25 countries; serving major oil companies such as Shell, Total, Exxon (Esso), Chevron-Texaco, BP, and more.

Licensing with Tanknology provides benefits that go far beyond a typical manufacturer-buyer relationship. Numerous Major Oil Companies (MOCs) around the globe recognize our Technologies as "The Standard" and rank Tanknology as the #1 Company for UST systems testing & inspections.

Our industry-leading Forecourt Technologies, all of which are available to our International Licensees, include:

- **VacuTect®** Tank Tightness Testing System
- **PetroScope®** Robotic Tank Inspection Camera
- **TankCam™** Qualitative Tank Inspection Camera
- **TankClean™** Remote Video UST Cleaning System

On the back of this page you will find a summary of the significant benefits that come with being a part of the Tanknology International Licensing Program.

International Licensing Program Benefits

Brand & Trademarks: The renowned Tanknology brand, licensed to each exclusive Licensee for a specific territory, offers immediate recognition by MOCs and prestige for your service organization.

Technological Leadership: Only Tanknology Licensees have access to buy/lease our state of the art testing and inspection solutions that have modernized the UST testing market. Our technologies meet and surpass all requisite US certifications and have obtained numerous international certifications. Tanknology's Engineering R&D Division is constantly inventing new technologies and improving existing ones to meet the ever-evolving requirements of MOCs and environmental regulators.

Exclusive Territory: Each Tanknology Licensee is granted exclusive rights for a technology and trademark in a geographic territory.

Training and Support: Licensees receive weeks of extensive technical training upon start-up, either in the USA and/or in their local territory. Ongoing technical support continues long after training, and testing data is reviewed by our Quality Control experts to ensure worldwide excellence and consistency.

A Partnership: Tanknology's Licensing Program doesn't command high markups on equipment. True success comes over time and Tanknology's success is determined by a Licensee's success.

Industry Expertise: Licensing with Tanknology ensures your service company will have access to the industry leading knowledge to be successful in your market.
